User Story:

Frequently Asked Questions page will show the questions asked by people more often. Random visitors or patients can view the questions and answers on the page. They can search the question by writing the keyword into the search bar. The system will match that keyword and displays all related queries with answers to the viewer. Admin will have the right to add the content to this page, edit questions/answers and delete them. The FAQ table will store information in the database. Admin has access to write questions and answers.Once logged in as admin, can open the faq page. Write questions and answers and post.On post users can read faq pages. However, admin can edit, delete the faqs too.
